Supplement Figure 1. (A) Human USC all displayed "rice grain"-like morphology in the early passage (p2). (B) USC expressed markers of glomerular parietal epithelial cells (CD24, CD29 and CD44), and also classical cell surface markers of MSC (CD73, CD90, CD105, CD146 and SSEA-4) and negative expression of hematopoietic markers (CD 31, CD34 and CD45).
