Fig.S1

Fig. S1. The enrichment of tumor-associated antigens of tumor-associated exosomes.

Western blots for examining levels of lung-specific antigens in A549 TAEs. Total protein (20 μ g) was loaded for A549 TCLs and TAEs to measure the expression of heat shock protein 70 (Hsp70) and CA125. A549 TCLs and TAEs loading used are noted in the image.
