

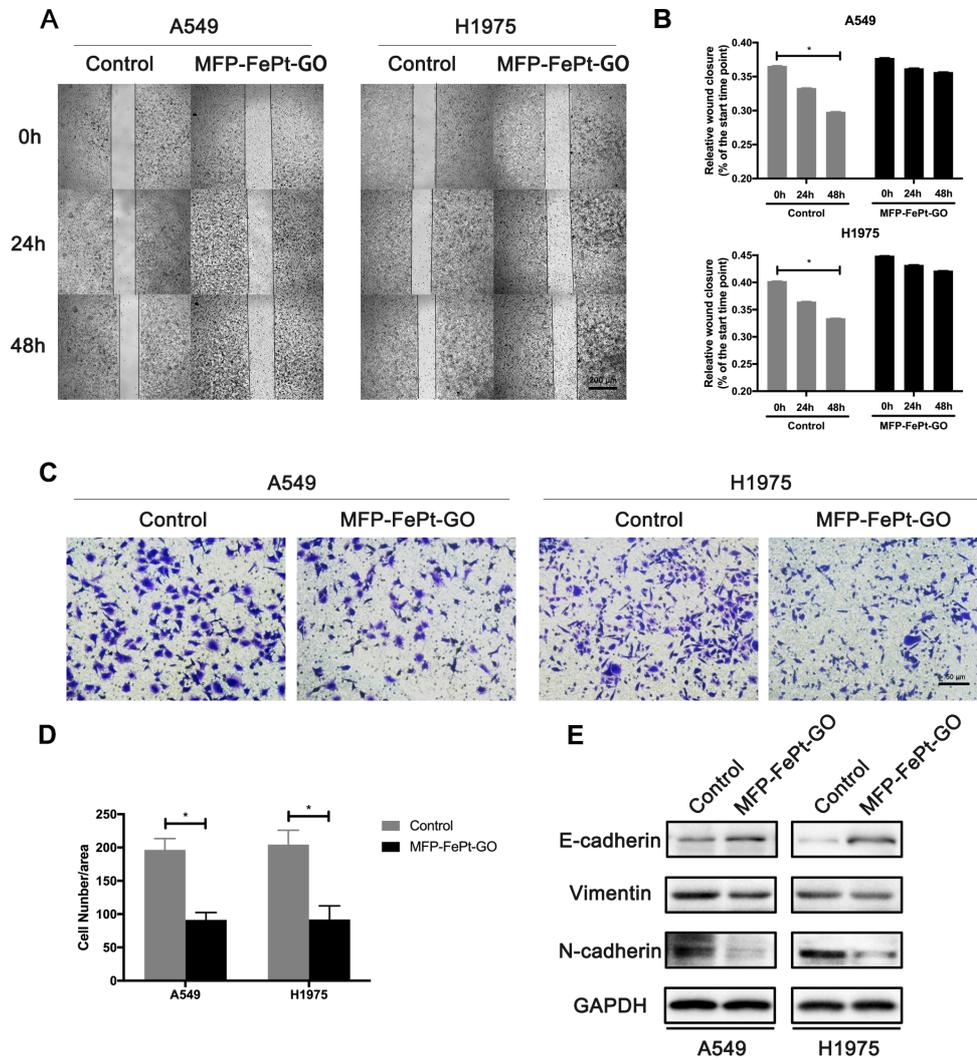

Figure S1

1 Figure S1. **MFP-FePt-GO suppresses migration and invasion of NSCLS**  
 2 **cells. (A) and (B)** Wound healing assay shows that the MFP-FePt-GO (20  
 3  $\mu\text{g}/\text{mL}$ ) suppresses NSCLC cell migration. **(C) and (D)** Transwell invasion assay  
 4 shows that MFP-FePt-GO suppresses NSCLC cell invasion. **(E)**  
 5 Representative immunoblotting of proteins involved in cell migration and EMT.  
 6 \*,  $p < 0.05$ ; \*\*,  $p < 0.01$ .
