

Figure S1. PUF60 regulates TERT expression in a c-Myc independent way. (A-B)

Knockdown of PUF60 in 786-O (A) and Caki-1 (B) cells. c-Myc expression was detected by RT-qPCR and western blot.

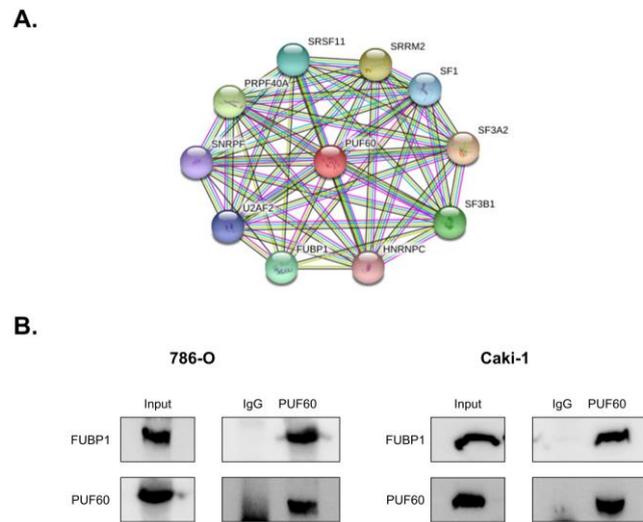

Figure S2. PUF60 interacts with FUBP1. (A) Protein-protein interaction analysis from STRING website. (B) co-IP assays between PUF60 and FUBP1 of 786-O and Caki-1 cells.
