

Figure S1. Effects of PCNP on the expression of pro- and anti-apoptotic proteins. a Western blotting analysis for the expression of cleaved caspase-3, cleaved caspase-8, cleaved caspase-9, cleaved PARP, Bax, Bcl-2, Bad and Bcl-xl in TPC-1 and ARO cells. GAPDH was used as the loading control. b, c The densitometry analyses of cleaved caspase-3, cleaved caspase-8, cleaved caspase-9, cleaved PARP, Bax, Bcl-2, Bad and Bcl-xl in TPC-1 and ARO cells, normalized to the corresponding GAPDH level. Values are presented as mean \pm SEM of three independent experiments; * $P < 0.05$, ** $P < 0.01$ compared with the Mock group; # $P < 0.05$, ## $P < 0.01$ compared with the sh-Scb group.
