In our paper, the authors noticed an error in Figure 5. In Figure 5D, we mistakenly used the typical HE staining photograph intended for shRNA-KILH in 97H cells from the shRNA-KILH Hep3B folder. The correct version of Figure 5 is provided below. The rest of the data and the conclusions originally reported in the paper remain unchanged. We apologize for any inconvenience that this error may have caused.

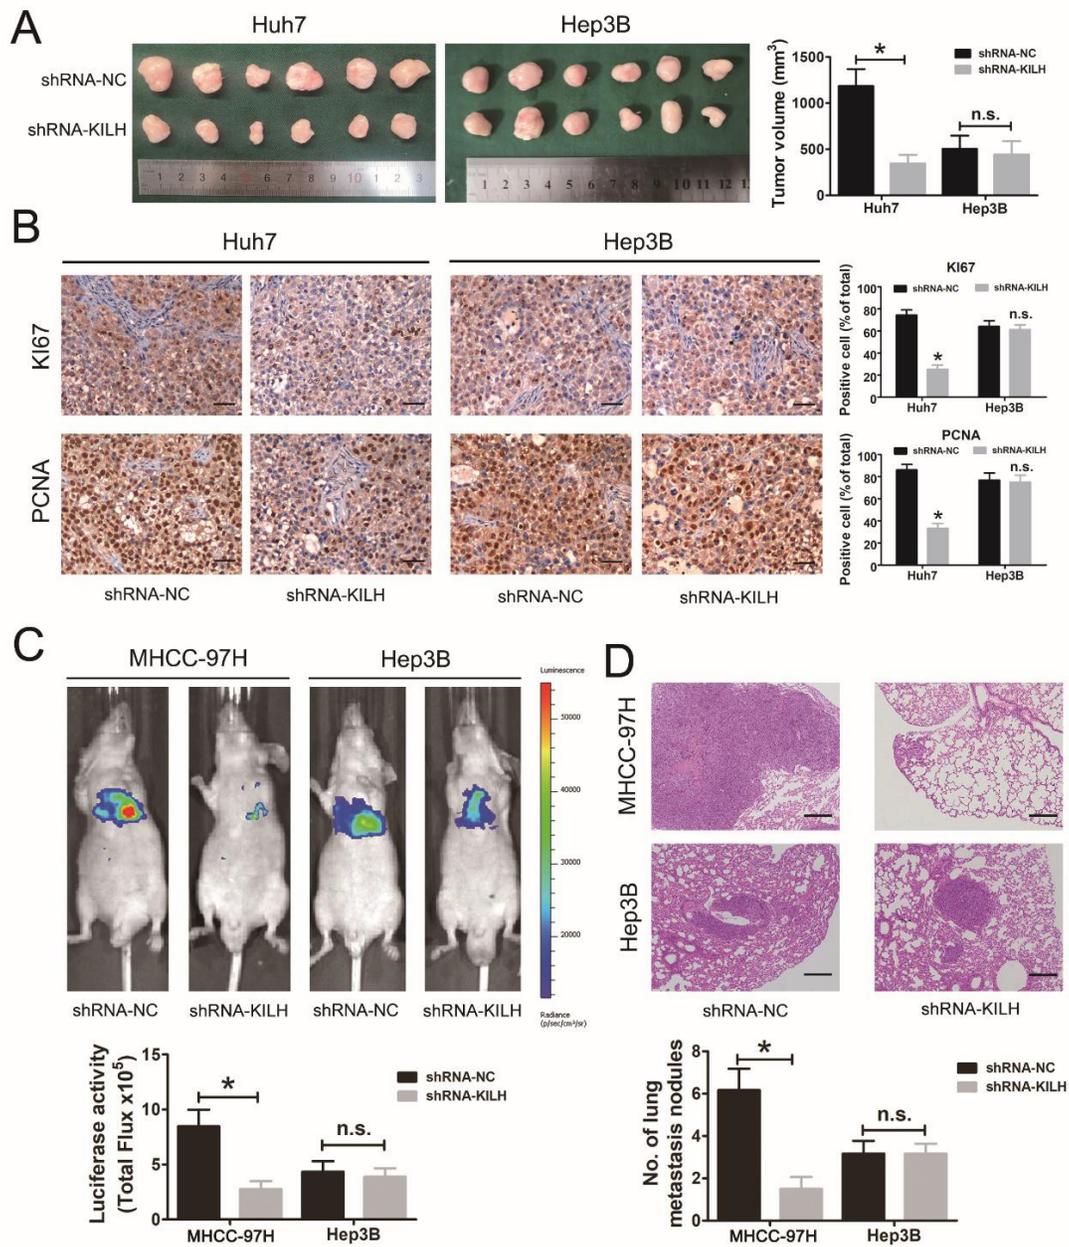

Figure 5. Correct image.
