

1

2 **Figure S1. Establishment of a Mettl3 stable knockdown cell line** A. Observation of
 3 the transfection efficiency of GFP-scramble (Sr)-shRNA and GFP-Mettl3-shRNA
 4 through fluorescence microscopy.

5

6

7 **Figure S2. PLGA encapsulated-Levosimendan ameliorates CDDP-induced renal**
8 **fibrosis.**

9 Measurements of renal function indicators BUN and serum creatinine of nude mice
10 enduring PLGA, PLGA/CDDP or PLGA-Levosimendan/CDDP with A2780 (A&B),
11 MDM-231 (G&H) or T24 (M&N) tumor xenografts. C, I&O. H&E staining and
12 Masson's trichrome staining. D, J and P. Tubular damage score. E, K&Q. Area of
13 fibrosis. *P < 0.05 versus ctrl. #0.05 versus CDDP.
